What's that in the SKY?

Surrounding Tulsa Metro –The weather is wonderful and many will be celebrating the New Year with fireworks, sparklers, party poppers, confetti blasters and the noise maker of their choice. The hottest item on the market for New Year's fun might spawn sightings of UFO's. Chinese Sky Lanterns are hot air filled parachutes that quietly glow and float into the night. Sky Lanterns are often used for weddings and occasions of all types but they can make the perfect way to say good bye to the old year and in with the new. These items are guilty of controversy due to their quiet nature, they sometimes spark thoughts of alien aircraft by unsuspecting on lookers.

New Year's fireworks sales are expected to do well after reports of healthy growth in overall retail sales in December. "We are grateful for a great weather forecast," says Sherry Barbour, co founder of Big Blast Fireworks. "Clear night skies will provide a beautiful back drop to night illuminations".

Break out the picnic baskets we have spring like weather. Last year we had snow, ice and yuck, this year we are ready to party!
